SOFT SKILLS

- Responsible
- Organization
- Communication
- Committed to work
- Analysis capacity
- Satisfy the objectives that are set
- Ability to find solutions to problems
- Ease of writing

JAQUELINE GÓNGORA

EXPERIENCE

I have no experience with these kind of areas and I don't know programming, only what I learn in school and internet, but I want to learn.

I have worked as manager in a restaurant, I know how to organize my time, work and lead a team and learn what is necessary on my own.

The project I did the previous semester for FIS was a WhatsApp bot and, although I didn't know programming like other members of my team, I learned new tools and used my knowledge to contribute in other areas such as organization and documentation.

STUDIES

Universidad Autónoma de Yucatán

- Preparatoria Dos
- Licenciatura en ingeniería de software.
- Soft skills management course

HARD SKILLS

Microsoft Office package - Intermedio
Canva

IDIOMAS

Inglish- Intermediate

PROPUESTA

Ciberseguridad: Es un área importante ya que actualmente hay mucho impulso en la tecnología y para esto se debe asegurar que los datos y la información, tanto de las personas como de las empresas, están protegidos ante las amenazas.

Me interesa conocer más sobre esta área, cómo proteger la información, el uso de cifrados y conocer más herramientas para mejorar la seguridad.

Machine learning: El aprendizaje automático de las máquinas para facilitar las actividades humanas me parece muy interesante ya que creo que tiene potencial para automatizar muchos procesos en el futuro. Me gustaría aprender sus bases y cómo funciona.
